

# ***SUIDOGE WHITEPAPER***

## **INTRODUCTION**

SuiDoge is a project that leverages the advantages of a meme coin to create a unique and engaging ecosystem for decentralized finance (DeFi) and non-fungible tokens (NFTs).

One of the unique features of SuiDoge is that it is built around a meme coin, which has several advantages for the project.

Firstly, meme coins like SuiDoge have a strong community of followers who are passionate about the brand and its vision. This community is often highly engaged and actively participates in the development and promotion of the project. This can help to drive adoption and create a sense of loyalty among users.

Secondly, meme coins can help to attract attention to the project and generate buzz in the cryptocurrency community. This can lead to increased visibility and interest from potential users and investors to Suidoge and Sui blockchain at large.

Finally, meme coins can be used to incentivize participation in the project's

ecosystem. For example, users could be rewarded with SuiDoge coins for staking their NFTs or participating in governance decisions. This can help to create a self-sustaining ecosystem where users are incentivized to contribute to the project's growth and development.

In this whitepaper, we will explore the various use cases for SuiDoge, such as art and collectibles, and how it can be used to drive innovation and creativity in the Sui ecosystem.

## **THE PROBLEM**

Despite the increasing popularity of cryptocurrencies, many coins lack sufficient

utility, leading to uncertainty from investors. This can make it difficult for users to interact with the network and use cryptocurrencies for fun and everyday transactions. We propose the creation of a new meme coin called Suidoge on Sui blockchain, with multiple utilities, including NFTs, staking dapps and Lotteries. By providing these utilities, Suidoge aims to create a more valuable and user-friendly cryptocurrency that will drive adoption and growth in the market.

## THE SOLUTION

Suidoge will have multiple utilities that will make it more valuable and useful to investors and users. Firstly, Suidoge will offer NFTs, which will provide unique

and valuable digital assets that can be traded and collected. The creation of Staking dapps for Suidoge tokens and NFTs will also allow users to earn rewards for holding and staking their tokens.

Additionally Suidoge will create lottery bots for buyers to win 1% of Sui coins traded for SuiDoge within a specified period of time. By providing these utilities, Suidoge aims to create a more valuable and fun cryptocurrency that will help to drive adoption and growth in the market. Additionally, by utilizing Sui, Suidoge will be able to offer fast and low-cost transactions, making it more accessible to a wider range of users.

## SUIDOGE NFTs

Non-fungible tokens (NFTs) have become increasingly popular in recent years, especially in the world of art and

collectibles. These digital assets are unique and cannot be exchanged on a one-to-one basis, making them valuable in their own right. As part of the Suidoge project, we will be offering a limited collection of 3500 NFTs featuring the best of arts a collector would ever dream of.

## **Purpose of NFTs:**

1. Art: The NFTs will feature unique and high-quality art, making them valuable to art collectors and enthusiasts. Each NFT will be one-of-a-kind, adding to their collectability and value. Owning one of

these NFTs will give collectors the opportunity to own a piece of digital art that is both rare and unique.

2. Identity: The NFTs will also provide identity to our community members by giving them a cool pfp (profile picture) that will differentiate them from other members of the cryptoverse. This will help to build a sense of community and belonging among Suidoge holders and create a more engaging and interactive user experience.

3. Earn token staking: NFT holders will be able to stake their tokens to earn rewards in the form of Suidoge tokens. This will provide an additional incentive

for collectors to hold onto their NFTs and encourage the long-term growth of the Suidoge ecosystem.

4. Voting rights: NFT holders will also be given voting rights, enabling them to participate in the governance of the Suidoge project. This will provide a more democratic and community-community-driven approach to decision-making, ensuring that the project is guided by the interests of its users.

5. Future benefits: Finally, NFT holders may also be entitled to future benefits arising from collaborations with other

projects or partnerships that Suidoge may establish in the future. This could include exclusive access to new products or services, or even additional NFTs featuring unique collaborations between artists and other projects.

Overall, the NFTs offered by the Suidoge project will provide a range of benefits to collectors and investors. From unique and high-quality art to community identity, token staking, voting rights, and future benefits, the NFTs will add significant value to the Suidoge ecosystem. As the project continues to evolve, we look forward to exploring new ways to utilize NFTs and other blockchain technologies to create even

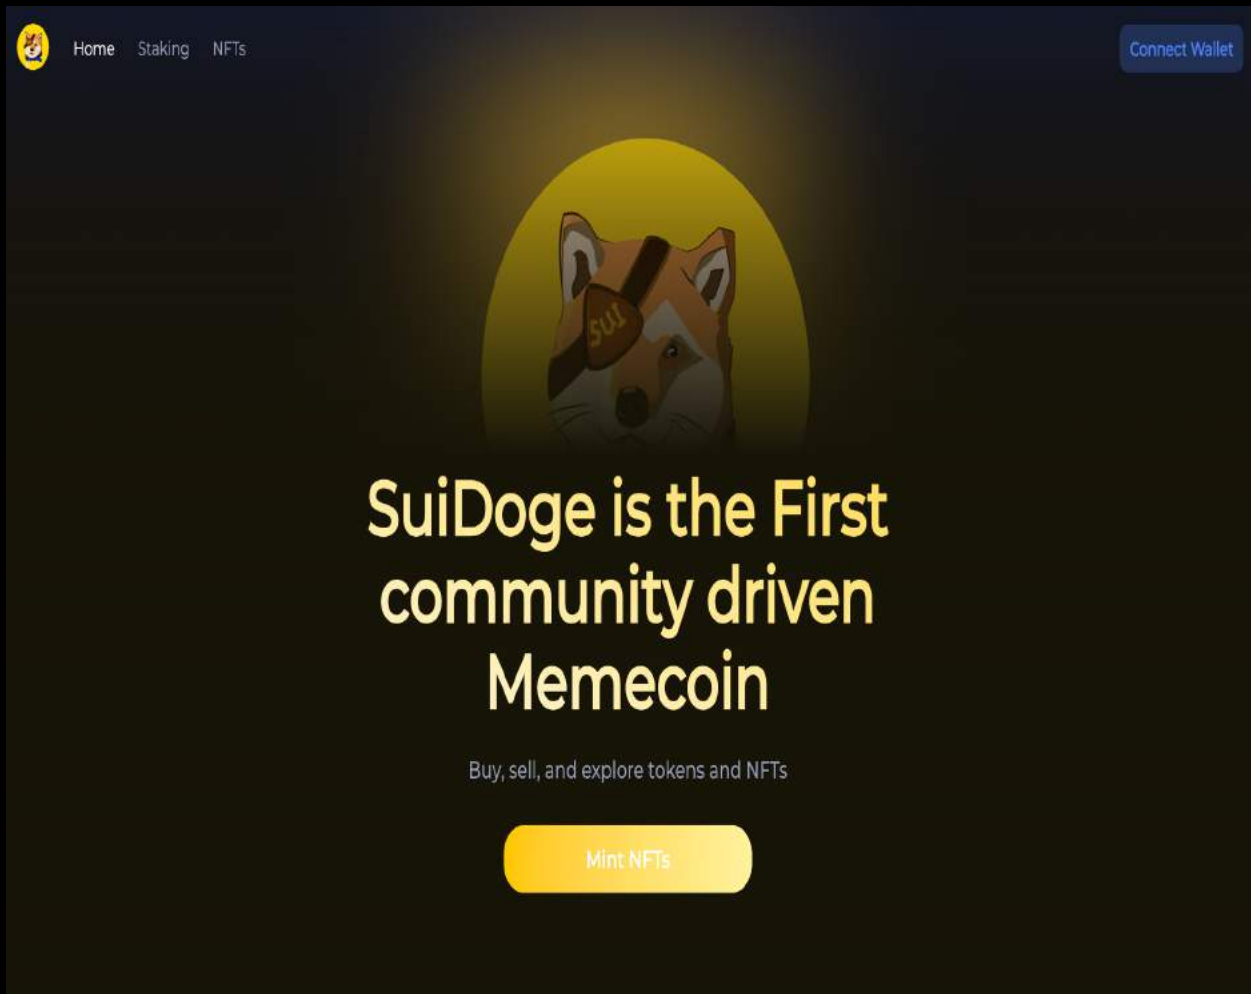

more exciting and valuable opportunities for our users.

## **THE DAPPS (decentralised applications)**

Decentralized applications (DApps) are becoming increasingly popular in the blockchain space, offering users a range of benefits, including greater security, privacy, and transparency. As part of the Suidoge project, we will be launching 4 DApps to enhance the user experience

and offer new opportunities for interaction with the platform

## DApp 1: NFT Minting

The first DApp we will be launching is for SuiDoge NFT minting, In the nearest future this DApp will allow users to create their own unique NFTs.

## **DApp 2 & 3: Staking DApp**

The second DApp we will be launching is for staking both Suidoge tokens and NFTs. This DApp will allow users to earn rewards for holding onto their Suidoge tokens and NFTs. Users can stake their tokens and NFTs for a specified period, after which they will be eligible to earn rewards in the form of Suidoge tokens. This DApp will provide an incentive for

users to hold onto their tokens and NFTs, encouraging long-term investment in the Suidoge ecosystem.

### **DApp 4: Airdrop eligibility checker and claiming tool for Sui testnet users.**

As part of our efforts to create a large and active community of users, we will be launching an Airdrop of tokens to eligible Sui testnet wallets.

To be eligible for the Airdrop, wallets must have interacted with the Sui testnet at least 50 times and be at least two months old by May 1st, 2023. While the Airdrop will be relatively small, we believe that the tokens will be valuable

as the project grows.

The primary objective of the Airdrop is to raise awareness of SuiDoge and foster a committed user base. We believe that by rewarding active and engaged users, we can build a vibrant community that will help drive the project's success.

## **LOTTERY BOTs**

Buyers of Suidoge are entered into a raffle by default. They stand a chance to win 1% of all buy volume in Sui over a particular period of time.

Overall, the DApps offered by the Suidoge project will provide a range of benefits to users, including greater control over their NFTs and tokens, the ability to earn rewards for holding onto their assets, and a more engaging and interactive user experience. As the project continues to evolve, we look forward to exploring new ways to utilize DApps and other blockchain technologies to create even more exciting and valuable opportunities for our users.

# TOKENOMICS

Tokenomics is a critical aspect of any blockchain project, determining how tokens are distributed and utilized within the ecosystem. The Suidoge project is no exception, with a carefully crafted tokenomics model designed to promote long-term value and sustainability.

TOKEN DISTRIBUTION	TOKENS
Total supply	1,000,000,000.
Liquidity	500,000,000.
Private sale	100,000,000.

Token staking	100,000,000.
NFT staking	100,000,000.
Team	40,000,000.
Marketing/promotion	160,000,000.

## Token lock timeline

TOKEN DISTRIBUTION	% LOCK	DURATION (weeks)
Liquidity	100	52
Private sale	25% weekly vesting	4
Token staking	0	0

NFT staking	0	0
Team	50	1
Marketing	62.5	4

The Suidoge token has a total supply of 1 billion tokens, with the majority of the tokens allocated for liquidity, token staking, NFT staking, marketing, promotion, and partnerships. 50% of the tokens are reserved for liquidity, ensuring there is enough liquidity on exchanges for trading purposes. 20% of the tokens are allocated for both token staking and NFT staking, allowing users to earn rewards for holding onto their tokens and NFTs. 10% for private sale.

The team behind the Suidoge project will receive 4% of the tokens, providing them with a vested interest in the success of the project. Finally, 16% of the tokens are allocated for marketing, promotion, and partnerships, allowing the project to build awareness and establish strategic partnerships to help drive growth and adoption.

## **ROADMAP**

### **Q2 between April - May:**

1. Project conception and initialization
2. Web design
3. Social media building

4. Whitepaper design
5. Token contract
6. Dapps construction
7. NFTs production commences
8. Marketing campaign I
- 9. Token launch + lottery bots and buy bots launch**
10. Dapps launch (token staking dapp, nft staking dapp, nft minting dapp)
11. Staking launch
12. NFTs minting
13. Marketing campaign II
14. Marketing campaign III
15. Token burn

16. CG and CMC listing

17. Marketing campaign IV

## **SUMMARY**

The Suidoge project is an innovative meme coin project that offer users a range of benefits, including NFTs, staking, and cross-chain compatibility.

The project's NFTs offer users a unique opportunity to own limited-edition digital art, while the staking dapps allow users to earn rewards for holding onto their tokens and NFTs.

The tokenomics model is carefully crafted to ensure long-term value and sustainability, with the majority of the

tokens allocated for liquidity, staking, marketing, and partnerships. This approach ensures that the project has the resources and support it needs to continue to grow and thrive in the years ahead.

Overall, the Suidoge project is a significant innovation in the blockchain space, offering users a unique combination of features and benefits. With a talented team behind it and a strong focus on innovation and user engagement, the project is well-positioned to become a major player in the rapidly evolving blockchain ecosystem.
